

KATADYN DRIP - *the practical filter for large amounts of water*

PRODUCT CHARACTERISTICS

Technology: Ceradyn version: ceramic depth filtration (0,2 microns) Gravidyn version: ceramic with activated carbon granules.

Effect: Eliminates bacteria*, protozoa, cysts*, algae, spores, sediments and viruses in combination with particles greater than 0,2 microns. Reduces radioact.particles. (Gravidyn also reduces chemicals)

Output: Approx. 4 l/hour

Capacity: up to 150'000 litres water quality.
Gravidyn version: up to six months

Weight: Approx. 3,3 kg

Size: 25 x 45 cm

Guarantee: 2 year

Material: Silicone, ceramic, activated carbon

Article No.: 2110070 (Ceradyn)
2110080 (Gravidyn)

Series: Endurance

* see testresults on backside

FACTS

- No need for strength or connection to a tap thanks to gravity
- The Drip filter is used by international relief organisations as group equipment for preparing water. Also ideal for use in hunting, fishing and mountain huts
- The tried and tested ceramic depth filter removes bacteria, protozoa and other disease-causing agents. The principle: The micro-organisms cannot pass through the mini pores of the filter ceramic (0.2 microns) because of their size (greater than 0.2 microns = 0.0002 mm)
- Gravidyn version (ceramic with activated carbon granules) also reduces chemicals
- Unlike disposable filters, the ceramic can be cleaned several times - even in the field. Advantage: longer use and lower operating costs

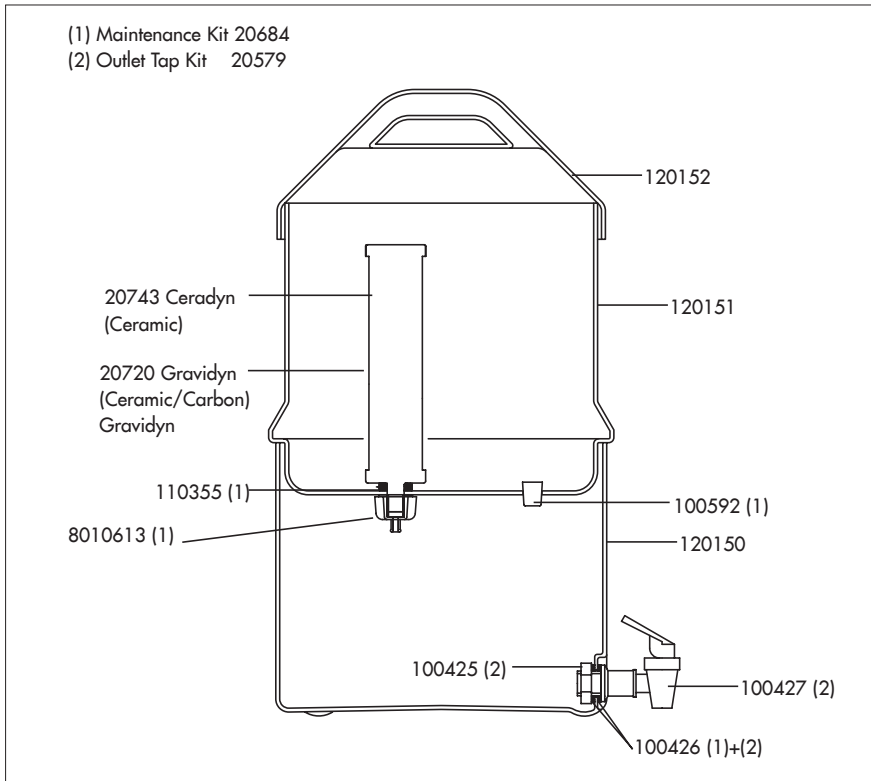

PRODUCT CHARACTERISTICS >BENEFITS

- High performance > particularly suitable for large groups
- Gravity filter > convenient water filtration without pumping
- Cleanable ceramic filter element > also filters very cloudy water
- Long lasting life of 150,000 litres of water > minimal operating costs
- No movable parts > simple maintenance
- Measuring gauge supplied > indicates when the filter element should be changed

SHORT PROFILE
Practical filter with high water performance. For 1-6 people and longterm use - for example in camps, huts, on construction sites

KATADYN DRIP - *the practical filter for large amounts of water*
