

KATADYN VARIO - *The fastest small water pump of the world*

PRODUCT CHARACTERISTICS

Technology: Pumpfilter; ceramic prefilter, 0.3 micron glasfibre membrane, replaceable activated carbon granulate

Effect: Eliminates bacteria*, protozoa*, cysts, algae, spores, sediments. Reduces chemicals and improves taste and odour.

Output: Approx. 2 l/min (Faster Flow)
Approx. 1 l/min (Longer Life)

Capacity: Up to 2'000 litres depending on water quality

Weight: Approx. 460 g

Size: 7,5 x 18,5 cm.

Guarantee: 2 years

Material: Plastics, ceramic, glasfibre, activated carbon granulate (GAC), silicone

Accessories: Prefilter, bottle clip and carry bag

Article No.: 8014932

Series: Backcountry

* see testresults on backside

FACTS

- Outdoors you find everyday changing water conditions. One day it is clear, the other turbid or smells bad. A water filter with different modes of operation is the answer.
- The new Katadyn filter pump uses ceramic as cleanable dirt shield and glasfibre for microbiological filtration with minimal pump resistance.
- In mode "LONGER LIFE" the turbid water is first prefiltered through the ceramic disk.
- When operating in mode "FASTER FLOW" the water is directed straight to the glasfibre membrane, increasing the water flow to up to 2 l/min.
- Replaceable activated carbon granulate reduces chemicals and improves taste and odour.
- A dual piston mechanism provides continuous water flow with minimal effort.
- Replacement filters are sold separately (ceramic disk, glasfibre with AC, activated carbon granulate refills)
- Winner of the "Industry Award 2006" and the "ISPO Outdoor Award Summer 2006".

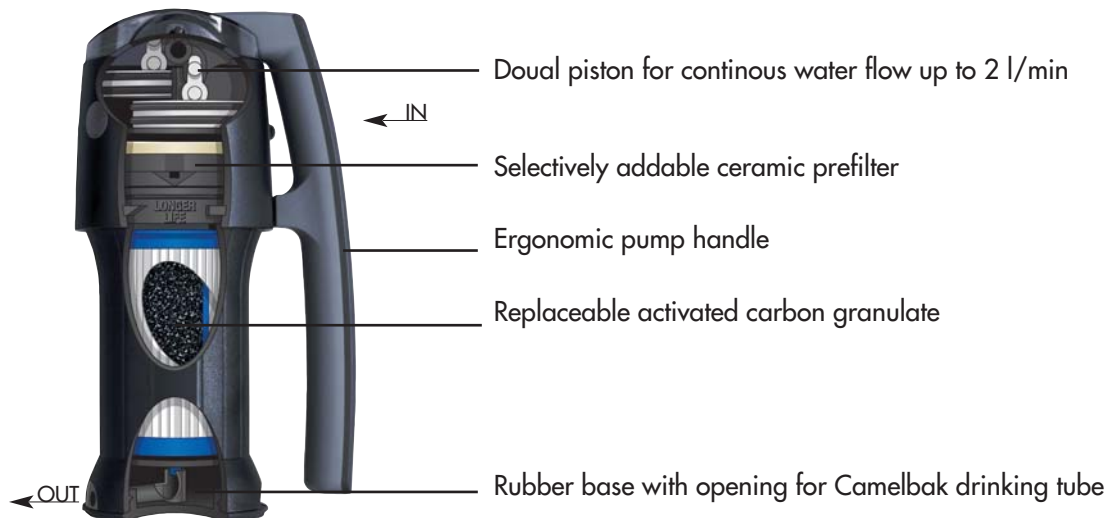

PRODUCT CHARACTERISTICS > BENEFITS

- Selectively addable ceramic prefilter > ceramic is cleanable and protects the not cleanable glasfibre from soiling
- With activated carbon core > improves taste and adsorbs chemicals
- Dual piston > water flows continuously when raising and lowering the pump handle
- Rubber base > provides for a secure stand
- Integrated bottle thread > fits directly on Nalgene bottles (wide mouth)
- Outlet tube with bottle clip > easy filling of various containers

SHORT PROFILE
Fast, convenient and adaptable to various water conditions. Pumps up to 2 l/min. For 1 to 4 people. Ideal for backpacking and trekking.
